Why Should I Save?

Why should you save your money? Here are three good reasons:

1. To increase your independence
2. To get all the things you want
3. To make you rich

Yeah, being rich enough to buy everything you want is cool. But having the money you need to be self-reliant is a lot better.

It's all about you and your life. You'll be able go where you want to go, do what you want to do, and buy the things you desire. Think about the possibilities. You could fly to Tahiti for a vacation. Or, take flying lessons. Or, buy the plane.

Being a good money manager will put you in control. Right now you depend on your parents for lots of things, including money. As you grow and gain your independence, the better you are at managing your money, the more you'll get out of life.
